

## **AUTOMATED SELECTION OF VIDEO GAMING OPTIONS**

### Abstract of the Disclosure

5 A gaming apparatus may include a display unit capable of generating video  
images, a value input device and a controller operatively coupled to the display unit and  
the value input device. The controller may comprise a processor and a memory, and may  
be programmed to allow a person to make a wager, to make an automated selection from  
among a plurality of user-selectable options presented to the player, to cause a video  
10 image representing a game to be generated on the display unit, and to determine a value  
payout associated with an outcome of the game.
